Education

University of Florida (UF) - Gainesville, FL

May 2028

Bachelor of Science in Data Science

Certificate in Artificial Intelligence Fundamentals and Applications Certificate

Relevant Coursework: Calculus 3, Programming Fundamentals 2, R Programming, Computational Linear Algebra, Foundations of Business Analytics and Artificial Intelligence, Computational Math, Discrete Math, Probability, Regression Analysis, Linear Algebra for Data Science

Honors & Awards: Emerging Gator Award (2025), Dean's List, Top 20 McKinsey Case Competition, SCUDEM Outstanding Award, 3rd Place Overall Code4Change, Best Finance Project SASE Hacks 2026

Experience

Product Management Intern - Stealth Startup

May 2026 - Present

- Sole Product Manager at an early-stage consumer AI startup, redesigning the end-to-end experience across onboarding, style profiling, recommendations, wardrobe, and personalization.
- Drove 10+ product initiatives from concept to launch, including personal color analysis, facial evaluation, style quiz, outfit planning, beauty/accessory recommendations, and marketplace features; co-developed grading and recommendation logic with engineering.
- Analyzed 24 competitors and gathered feedback from 100+ users, including 20+ direct conversations, using insights to prioritize the roadmap and guide weekly UI/UX iterations.

Product Management Intern - Lattéra, Gator Creek LLC

Feb. 2026 - Aug. 2028

- Led 2 campus MVP activations reaching 600+ students, generating 1,400+ tastings, 260+ full-size trials, and 182 survey responses; identified 61% purchase intent and 82.4% support for on-campus placement to inform product and launch strategy.
- Designed a rule-based refund decision engine using Nayax transaction data and weighted confidence scoring across 6 signals, defining automated refund, manual-review, and fraud-handling workflows and building structured logs for future ML model training.
- Owned MVP measurement and launch strategy across pilot, launch, and operations stages; defined KPI frameworks and evaluated 30–60 prospective locations across Gainesville and Orlando to prioritize placement, ICPs, and partner outreach.

Risk Advisory Intern - Deloitte

Jun. 2025 - Aug. 2025

- Advised client leadership on ESG and data governance for a \$40M EV project, aligning 55+ performance metrics with global standards and supporting board-level technology strategy and compliance planning.
- Defined 30+ system requirements for a top-4 bank's data security transformation, translating business and risk needs into functional specifications and process requirements to strengthen incident detection and monitoring.
- Developed and delivered 6 executive dashboards and supported ESG reporting/documentation by organizing project files and evidence logs, consolidating source data, and drafting report content to improve reporting consistency and client review readiness.

Technology Consulting Intern - Thanh Phat Digital Technology Investment Co., Ltd.

Apr. 2025 - Jun. 2025

- Designed digital readiness frameworks and analytics dashboards across 3 provinces, guiding e-governance transformation priorities.
- Built Python ROI models for a \$2.4M solar project, improving scenario testing and vendor benchmarking.
- Partnered with provincial leaders to translate business needs into actionable technology roadmaps, aligning transformation with budget and security requirements.

Undergraduate Research Assistant - GETCOT Lab - University of Florida

Apr. 2025 - Dec. 2025

- Researched EU Digital Product Passport and circular economy rules to assess impacts on battery reuse and recycling.
- Processed and modeled ~500K end-of-life battery & HDD records in Python to map recovery pathways.
- Linked recovery data with economic indicators to evaluate cost–benefit trade-offs between recycling and reuse.

Undergraduate Research Assistant - Research Evaluation and Methodology Program

Feb. 2025 - Oct. 2025

- Organize ~40 academic sources; evaluate chatbot response accuracy.
- Code and check ~200 qualitative data points for inter-rater reliability.

Projects

Job Application Assistant

Aug. 2026

- Designed and built an AI-powered job application platform that streamlines resume tailoring, application autofill, and pipeline tracking, consolidating the end-to-end job search workflow into a single product.
- Defined core user flows and MVP features around application tracking and recruiter-response detection, integrating email signals to automatically classify interview, rejection, and follow-up statuses and reduce manual tracking.

Campus Compass

Jul. 2026

- Built a C++ campus routing system using Dijkstra's shortest-path algorithm and Kruskal's minimum spanning tree algorithm.
- Implemented reversible road closures, student schedule management, and a command parser validated through 57 passing tests.

Personal Portfolio Website

May 2026

- Designed and developed a responsive personal portfolio to showcase 10+ projects, professional experiences, photography, and travel, creating a cohesive digital identity around product, data, and visual storytelling.
- Built custom interactive experiences including a Netflix-inspired project gallery, destination-based travel pages, dark mode, and reusable responsive components, combining frontend development with UX/UI and personal branding.

CartCoach – AI-Powered Chrome Extension for Smarter Spending Decisions

Mar. 2026

- Helped develop CartCoach, a Chrome extension designed to reduce impulse spending by surfacing real-time budget impact, savings-goal delay, and lower-cost alternatives at the point of purchase.
- Contributed to backend and product logic using FastAPI, MongoDB, and Gemini API to support personalized financial recommendations, user behavior tracking, and dashboard insights for more informed spending decisions.

Kite – Gamified Pediatric Stealth Assessment Platform

Feb. 2026

- Led market research and product strategy for a gamified pediatric health app, architecting measurement systems capturing 1,000+ interaction data points per session across cognitive, motor, and behavioral signals, enabling longitudinal tracking of patient trends.
- Designed event-driven analytics and reporting translating gameplay telemetry into clinician-ready insights and automated flagging logic, reducing manual observation effort by ~70% while supporting cross-functional mobile, backend, and dashboard development

WNBA Franchise Strategy Simulator

Jan. 2026

- Led development of WNBA team decision simulation integrating 44+ player records, salary cap, and fan demand modeling; evaluated 4 strategic scenarios and projected \$56M–\$79M season profit range to support roster, pricing, and capital allocation decisions.
- Designed 200-trial Monte Carlo risk analysis and multi-KPI dashboards, enabling scenario stress-testing and confirming 0% simulated bankruptcy risk under baseline and macro conditions.

Gamified Housing Affordability & Pricing Model

Dec. 2025

- Designed and cleaned a 20,000+ record housing dataset, implementing least-squares multiple linear regression ($R^2 \approx 0.75$) to identify and quantify key price drivers such as size, quality, and build year.
- Developed a Streamlit-based interactive decision tool that translates regression outputs into actionable insights, including real-time price prediction, budget feasibility analysis, cost breakdowns, and optimization scenarios to support housing and investment decisions.

TikTok Favorite: AI-Driven Save Experience Redesign

Oct. 2025

- Led a solo project to redesign TikTok's "Save" feature, introducing AI-driven suggestions, boosting user engagement by 20% and improving content organization by 15%.
- Analyzed user feedback from 500+ respondents, identifying pain points and justifying design changes to enhance user experience.

Wandr: Connecting People through Personalized Travel & Experiences

Oct. 2025

- Led the design of user flows, MVP roadmap, and IID & selfie verification system, increasing user safety by 30%, while collaborating with a team of 3 to drive app development.
- Implemented features like personalized recommendations and group activities, boosting user engagement by 20%.

Vyspar: Collaborative Platform for Healthcare Professionals

Sep. 2025

- Collaborated with a 5-person team to build a “LinkedIn for healthcare professionals,” **leading backend development for 10+ RESTful APIs, migrating 50K+ records**, and integrating 3 external healthcare data sources.
- Partnered with one teammate to develop an enterprise Tableau dashboard tracking 1,200+ member activities and 20+ key platform analytics to support data-driven decision-making.

SmartPrep AI

Sep. 2025

- Built a mobile app using **computer vision** to detect and classify ingredients from photos, auto-generating meal plans and grocery lists tailored to user preferences.
- Drove project execution with 4 people, integrating AI, UX, and sustainability features to improve usability and reduce food waste.

BiasLens: Detecting Algorithmic Bias in Real-World Datasets

Apr. 2025

- Built a Streamlit app using Python, Fairlearn, and scikit-learn to audit algorithmic bias in real-world datasets (~10,000+ records), applying metrics like Demographic Parity and Equal Opportunity.
- Delivered actionable insights and tested mitigation strategies (reweighing, threshold adjustments), improving fairness outcomes by ~20% and enhancing decision-making reliability.

GatorBot - Deloitte Innovation Challenge: AI Solution for Campus Support

Apr. 2025

- Built GatorBot, an AI chatbot using Python and NLP to centralize student support, cutting referral time by ~70% and addressing 60%+ awareness gaps.
- Designed architecture projected to reduce workload by 40% and save ~\$50,000+ annually in administrative costs.

Savills Commercial Real Estate Analysis - ASA DataFest

Mar. 2025

- Worked with a team of 4 to conduct advanced data analysis on 100,000+ U.S. leasing transactions (2018–2024) using Python and pandas, identifying trends in office space demand across tech, legal, and financial sectors.
- Translated complex datasets into business insights and recommendations for market entry, relocation, and expansion strategies across 10+ major cities, enhancing client decision-making.

Artificial Reef Web App and Data Conversion

Nov. 2024

- Designed and implemented a MongoDB schema with Mongoose models, improving query performance by ~30% through data validation, indexing, and relationship optimization.
- Collaborated on a 5-person team to develop a full-stack web app visualizing 3D reef models, increasing ecological data accessibility for ~5,000+ Louisiana CCA users.

Involvements

External Vice President - UF Data Science & Informatics

Apr. 2025 - Present

- Drove outreach with AIIRI, Google, Microsoft, Deloitte, ..., and startups; negotiated funding, launched student projects, and initiated partnership with UF Career Connections Center to host career-readiness workshops.
- Hosted 5+ research and industry tours, connecting 350+ members with labs, startups, and industry professionals, leading to 8+ winning hackathon teams.

- Directed marketing and outreach that grew internal engagement by 300% and boosted student–employer engagement by 600%, earning Student Org of the Year and Career Influencer Award.

Operation Committee Head - WingHacks

Apr. 2025 - Present

- Lead strategic planning for WingHacks 2027 operations, overseeing venue logistics, resource allocation, catering coordination, procurement, setup, and event-day workflows to support smooth end-to-end execution.
- Coordinate with sponsorship, design, outreach, and other committees to align operational requirements, timelines, budgets, vendor needs, and participant experience across the broader hackathon planning process.
- Develop committee delegation structures, purchasing schedules, contingency plans, and day-of operating procedures, establishing clear ownership and processes for efficient event execution.

Treasurer - Vietnam International Student Association

Aug. 2024 - May 2026

- Manage \$10,000+ annual budget and secure \$5,000+ in sponsorships to support cross-functional initiatives.
- Lead planning and execution of large-scale Tết Festivals (300+ attendees), overseeing logistics and resource allocation.

Additional Information

Programming Languages: Python, TypeScript, JavaScript, C++17, R, MATLAB

Frontend Development: React, React Native, HTML/CSS, Tailwind CSS, Expo

Backend & APIs: Node.js, Express, FastAPI, REST APIs, cpp-http lib, Chrome Manifest V3

Technologies: GitHub, Jupyter Notebook, MongoDB, PostgreSQL (basic), MATLAB

Databases & Data Access: MongoDB, PostgreSQL, Mongoose, Motor, Knex.js

Developer Tools & Testing: GitHub, Vite, Turborepo, pnpm, CMake, Catch2, Playwright, Jupyter Notebook

Data Science & Machine Learning: pandas, scikit-learn, Fairlearn, Natural Language Processing, Computer Vision, Statistical Analysis, Monte Carlo Simulation, Mathematical Modeling, Differential Equations, Probability Theory

AI & Conversational Products: Gemini 2.5 Flash, Generative AI, Chatbot Development, AI UX

Analytics & Visualization: Tableau, Streamlit, Leaflet.js, Data Visualization, 3D Visualization, Product Analytics

Geospatial Technologies: OSRM, OpenStreetMap, Overpass API

Product & Design: Figma, Prototyping, UX Design, UX Research, User Research, MVP Planning, Product Strategy

Languages: English (Fluent), Vietnamese (Native), Russian (Conversational)

Case Competitions: GatorBot - Deloitte Innovation Challenge: AI Solution for Campus Support, 2025 UAA Case Competition, Savills

Commercial Real Estate Analysis - ASA DataFest, Luby Microgrant Pitch Competition, Blackstone Launchpad, McKinsey Case Competition, SCUDEM X 2025, Code4Good, Bloomberg Bpuzzled, COMAP Mathematical/Interdisciplinary Contest in Modeling, Hacklytics 2026

Involvements: Vice President - AI Security & Risk Association, Fellow - Product Space, Social Chair, Treasurer - Vietnamese International Student Association, Intern (Fundraising Committee), Mentor - Society of Asian Scientists and Engineers, Mentor - GatorAI, Member - Gator Student Consulting Organization

Selected participant in early career programs: BCG Launch, McKinsey Forward, Forte Career Ready Certificate, JPMorgan Chase Spring Insights, and Morgan Stanley Early Insights
